SUMMARY

Product designer with 4 years of experience (previously 3 years in Graphic Design), mostly working on websites, SaaS tools and B2B systems. Focus is UX and usability, backed by hands-on design systems work.

WORK EXPERIENCE

Product Designer @ Secomus Technology

Sep 2023 – May 2026

- Led end-to-end design process for multiple Shopify apps (discount badges, SEO suite, product reviews), from user research and ideation to launch, monitoring, and iteration.
- Partnered with cross-functional departments, ensuring app performance and making sure team members stayed up to date on new releases.
- Ran research to uncover problems, building feedback loops and used as grounded research for backlog ordering.
- Monitored app metrics: churn rate, upgrade rate and other behavior metrics; used data-driven insights to identify gaps and plan improvements.
- Audited designs to ensure compliance with Shopify app standards.
- Handled app interfaces and graphic materials for marketing.
- Planned interviews and trainings for interns.

Highlights: reduced uninstall-in-day by 25% comparing to the previous month by updating onboarding flow, led 2 big features launching and contributed to 30% increase in revenue from new features (6m post launching comparing to previous launch), create a tool for tracking competitor's UI updates with NodeJS using AI,...

UI/UX Designer @ FPT Telecom

Mar 2022 – May 2023

- Collaborated with design and BA teams to develop UI solutions for a customer management application.
- Conducted internal usability testing sessions to surface interaction issues.

Graphic Designer @ Danson Group & Minh Ha Company

2018 – 2021

- Designed product packaging for company brands.
- Produced marketing publications, posters, and banners aligned to brand guidelines.
